NOTIFICATION

Subject: Security Certification for End of Sale/Life (EoS/EoL) Devices – Reg.

Vide NCCS/HQ/COMSEC/2023-24/III dated 19.09.2024, it was clarified that the devices for which EoS date is before the ITSAR mandatory enforcement date for the product category, such devices are exempted from initial security testing. However, if such devices undergo modification/update then OEM shall apply for security certificate by submitting internal test reports showing conformance to ITSAR.

2. In this regard, the undersigned has been directed to convey that the requirement for submitting internal test reports showing conformance to ITSAR has been done away with in case of EoS/EoL declared products. The applicants can apply for provisional security certificate by submitting their application under upgrade ER to ER+ITSAR flow. The applicant needs to declare EoS/ EoL dates and submit SDoC regarding conformance to ITSAR as part of the application procedure in the MTCTE portal. The Security Report Evaluation fee will not be charged in such cases and the validity of provisional security certificate will be five years or residual validity of ER certificate or till EoL date, whichever is earliest.

This issues with the approval of Sr. DDG, NCCS.

Hindi version will follow.
